Profile

A branding and marketing enthusiast with hands-on experience bridging creativity and technology. Currently pursuing a **Bachelor's degree in Creative Industries at BCIT**, I'm building a skill set that spans **strategic marketing, visual design, and print production**. I've sharpened my strategic thinking through AMA collegiate case competitions where our team placed 2nd across North America, and deepened my understanding of the physical side of design through hands-on work in commercial printing and photo lab operations at London Drugs, giving me a unique perspective on how brands come to life in print.
